

Meeting 2a

Date: Thurs Sept 26, 2013

Time: 11AM - 12PM

Location: BA2159

Attended: Lia, Ying, Jeff, Tae, Winston, Aashni

- discussed group commitments and came up with meeting charter

Meeting 2b

Date: Mon Sept 30, 2013

Time: 11PM - 12AM

Location: Google Hangouts

Attended: Ying, Jeff, Tae, Winston, Aashni

Missed: Lia

- discussed technological tools to be used, settled on Django

Gameplan

Group Member	Tasks
Everyone	- get familiar with Django - prioritize user stories (incl. reasoning)
Aashni	- set up login user story with PHP for comparison - look into Windows Azure
Ying and Jeff	- revise supervisor user story - test cases for client/admin stories - Jeff, find out what the other team is doing
Lia	- type up meeting note 2a & team charter - test cases for booker - make a google doc for user story priorities
Tae	- set up login user story with Django
Winston	- keep on top of Jaimie for the second picture - keep meeting minutes for 2b

Correspondences

Meeting 2a Summary - Lia

Hey guys, hope you all had a good weekend, just a reminder we have a group meeting tomorrow night on hangouts at 10:30, should take no longer than 10 mins.

@Aash and Winston: please try arrange that meeting, here's the phone number (416-697-3131) , so when you guys go, try to clarify the user stories we've written so we can add reasoning/convos to it, also please try to harrass the counter person SHANE, to either reply to the email, or ask her the questions in person? (you guys should have the questions in an e-mail)

@Tae: can implement a log-in page with Django, for 3 different user levels, the client/booker/admin.. this needs to be done by wed, we just want a comparison on relative ease of use first , also have a read through the different user stories as well please

@Aash/Winston, can you guys do the same with PHP, but using a framework , and then during the next meeting we can see which is easier

@Jeff/Ying, can the two of you work together and come up with the test cases for the client/admin user stories

And I will put up the meeting notes, and team charter by Wed, and test cases for booker user stories..

Let me know if I'm missing anything and if anyone has any concerns. Thanks!!

Meeting 2b Summary - Winston

Hey Guys,

Just summarizing today's meeting. We discussed two things today:

1. Meeting with our product champion:
She seems to be replying to the other group but not us. So Jeff will follow up with his friend to see when they are meeting her so that

we (Aashni and Winston) can tag along if available. Winston will call her in the morning to get a hold of her.

2. Django Vs PHP:

We will go Django, since it seems relatively simple and Python is a language most of us are familiar with.

Individual Tasks:

Ying & Jeff:

Meet together tomorrow (October 1st) to work on the user stories for the supervisor.

Tae:

Put together the login system in Django and push to Git. Someone help him, since we are all still new at this.

Aashni:

Meet with the product champion with Winston.

Winston:

Setup Windows Azure. Call Jaime in the morning (October 1st) to get a hold of her. Meet Jaime with Aashni.

Everyone:

Study up Django, let's get this ball rolling.

Whoever has time, please work with Tae on the login system and submit by Wednesday evening! If you have any resources or documentation that you are finding useful for Django, please email it to the entire group!

Regards,

Winston
